

Success Story | SavyX & bexio

«bexio delivers the solution we need for our everyday business. Working digitally with flexible structures is exactly what is important to us. The cloud solution complements my strategy perfectly.»

Dominik Gmür from SavyX GmbH

The Business

After gaining many years' experience at a large international auditing company, Dominik Gmür, owner and Managing Director of SavyX, knew that he would rather run his own business than work as an auditor. He had always been fascinated by stories about SMEs, so in 2015, he founded SavyX, his accounting and fiduciary services company. Dominik and his team provide modern fiduciary services, specialising mainly in the requirements and demands of SMEs. The name «SavyX» is a combination of the English word «sav(v)y» and an «X», which stands for «expert».

SavyX and bexio

Dominik Gmür is certain that digitisation offers SMEs a huge range of benefits. Optimising existing processes saves time, which also saves money. Dominik Gmür and his team have been using bexio's business software since 2015. He was looking for a bookkeeping program for his newly-founded company that would make it easy to exchange information with his clients. Flexibility was of the utmost import-

Founded:	2015

ance to Dominik Gmür, which is why he decided bexio was the perfect solution; cloud-based software that can be used anywhere. bexio can be used immediately, since there is no tedious installation process and no need to transfer massive amounts of data. He was also convinced that bexio would enable him to process customer enquiries with ease, while also providing his clients with a tool to manage their work processes. «The integrated banking interface impressed me right from the start. I can easily explain the software to my clients. There's no need for IT expertise – all it takes is a few clicks,» comments Dominik Gmür on using bexio.

He also takes advantage of the «clockodo» app, which was released on the bexio Marketplace a year ago. clockodo's cloud-based timekeeping software makes

it easy for Dominik to record his own working hours and those of his team, and to assign hours directly to a client or project so that they can be invoiced accordingly. As a service provider, he is always on the move, and is thus firmly convinced of the advantages of using the mobile app. Dominik Gmür has never neglected his timekeeping since he discovered our clockodo add-on. «And invoicing with bexio is so fast that I no longer have to give up my weekends.»

Why bexio is the perfect solution for SavyX

- ✓ Cloud-based software; works with any device, anytime and anywhere.
- ✓ Simplified collaboration with clients.
- ✓ Timekeeping for customers or projects with just a few mouse-clicks.
- ✓ User interface is simple, intuitive and flexible.
- ✓ Ready to use immediately without installation.
- ✓ Good value for money.

Our conclusion about bexio business software

«I can see that development is progressing and that the needs of the market are being recognised and implemented. Sometimes not quite as fast as I would like, but other software providers also needed years of development to get where they are now. But bexio is moving in the right direction. The support team is simply amazing – I don't know anyone who offers such great support as bexio – to my clients and to me personally,» enthuses Dominik Gmür. bexio enables SavyX to collaborate with its clients in a much more goal-oriented and efficient manner. Dominik can react more quickly and provide his clients with appropriate recommendations if liquidity bottlenecks occur or payment deadlines are not met. He and his team can now react so much faster that they can help clients to ensure that such problems do not arise in the first place.

«We offer our customers advice that helps them to manage their administrative tasks more successfully, more easily and digitally!»

Dominik Gmür.
